COD8.io

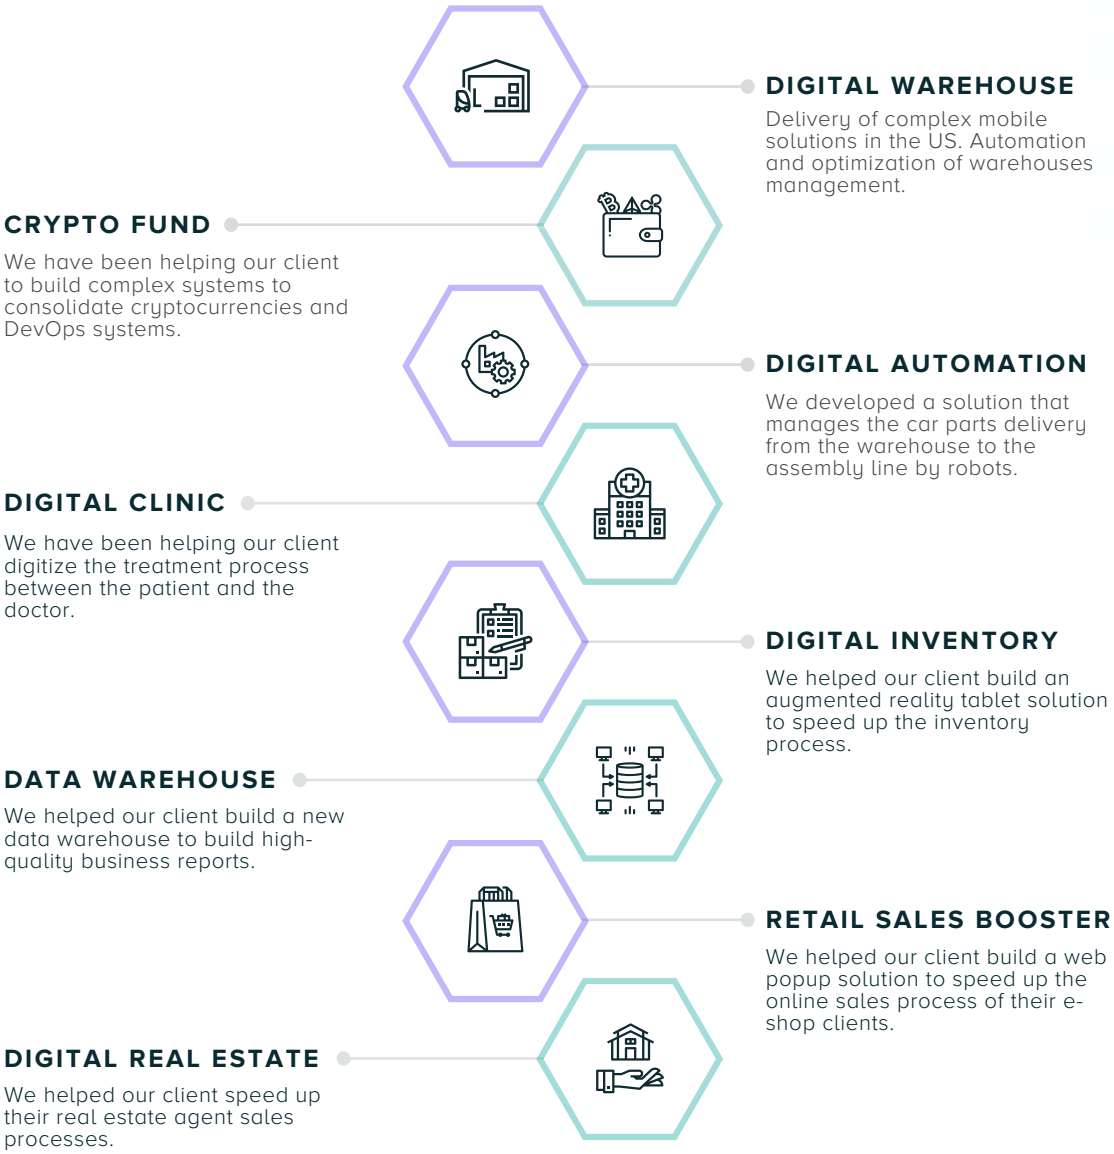
Projects we've delivered and taken pride in.



DIGITAL WAREHOUSE

Delivery of complex mobile solutions in the US. Automation and optimization of warehouses management.

CRYPTO FUND

We have been helping our client to build complex systems to consolidate cryptocurrencies and DevOps systems.

DIGITAL AUTOMATION

We developed a solution that manages the car parts delivery from the warehouse to the assembly line by robots.

DIGITAL CLINIC

We have been helping our client digitize the treatment process between the patient and the doctor.

DIGITAL INVENTORY

We helped our client build an augmented reality tablet solution to speed up the inventory process.

DATA WAREHOUSE

We helped our client build a new data warehouse to build high-quality business reports.

RETAIL SALES BOOSTER

We helped our client build a web popup solution to speed up the online sales process of their e-shop clients.

DIGITAL REAL ESTATE

We helped our client speed up their real estate agent sales processes.

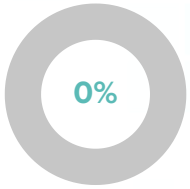
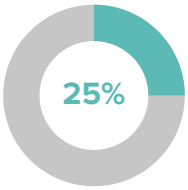
CODS.io

We have a unique process.

#1 Workshop

We guide you through an offline/online session to discuss project details and better understand your requirements.



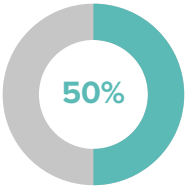


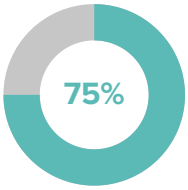
#2 Analysis

We analyze your project requirements to create an optimal and precise project plan specifically designed for your needs.

#3 Project plan

You get a structured document (time and cost estimates) and UX wireframes to be on the same page in each phase of the project.





#4 Agile dev

You have online sessions with our team once a week or two to check the progress and discuss the next steps and/or changes.

#5 Support

You get our full support to fix issues or enhance your current project. We will never let you stay alone on your journey to grow your business.
